KR.650,- PR SESSION

Years go by, stress, hormonal imbalances and external aggressions such as sun, cold and pollution play a negative role on the quality of the skin. Fine lines and wrinkles appears, skin becomes thinner, duller and loses its elasticity due to the loss of hyaluronic acid naturally present in the skin.

REVITACARE was honoured with several awards including CYTOCARE as « Best mesotherapy product » With more than 25 years of pharmaceutical experience and convinced that cellular biology is the secret to fighting the effects of aging, I created REVITACARE in 2003 to develop research in this field of science.

Before

After 3 treatments

REVITACARE is a French Laboratory specialized in cutting-edge Research, Development and Manufacturing of anti-aging highly elaborated formulas.
